**SCHOLASTIC BOOK FAIR KICKS OFF**

## **Curriculum Corner-Art-March**

Dear Families,

Art is an important part of our curriculum. Every day, children find a variety of art materials available on our shelves. These materials include recyclables. Please feel free to send in clean recyclable items to your teachers for upcoming projects.

Planning, drawing, painting, pasting, molding and constructing are not only enjoyable but also provide important opportunities for learning. Children express original ideas and feelings, improve their coordination, learn to recognize colors and textures, and develop creativity and pride in their accomplishments by exploring and using art materials.

When children are engaged in art activities, we talk with them about what they are doing and ask questions that encourage them to think about their ideas and express feelings. We are just as interested in the creative process as we are in what children make. We say things that will encourage the children to be creative and confident such as:

Art is a very easy way to bring your child's school life into your home. Children love to bring home their works of art to share with the most important people in their lives. Take time to talk with your child. Ask them to tell you about their picture. Ask them how they decided which colors to use and what they like best about their picture.
